### College

SQI college of ict, opposite Yoaco filling station, ogbomoso, oyo state  
2024-2026

### ABOUT ME

I am a passionate and self-motivated web developer with hands-on experience in HTML, CSS, Bootstrap, and beginner-level JavaScript. I specialize in building responsive, interactive, and visually appealing websites with a strong focus on user experience and design thinking. From creating full websites without JavaScript to building clean UI dashboards and interactive forms, I enjoy turning creative ideas into functional digital solutions. I'm currently expanding my skills in React and Node.js to become a full-stack developer and contribute to real-world projects.

### PROJECTS

#### Car Dealership Website

Designed a responsive, multi-page car dealership website using HTML, CSS, and Bootstrap.

Features included a car listings gallery, special offers, blog section, and contact form – all styled for modern aesthetics and mobile usability.

#### Weather App Checker

Developed a weather app using JavaScript, HTML, and CSS.

Enabled users to search for weather updates by city, displayed real-time data, and styled the interface with a weather-themed background for better UX.
